

# Relays & Modules Accessories

**Voltage Reduction Module**

## Technical specifications

- Input 6-36 VDC
- Output Current: 1.5A maximum (1A continuous)
- Output Voltage: 3, 6, 9, 12, 24 VDC
- 
- 
- 
- 

A step down DC-DC Converter that takes an input at a higher voltage and converts it into a lower voltage. The input voltage is selected by moving the included jumper to the required voltage.

## FEATURES

- Perfect for the jobs where your equipment has different power requirements. Can take any input from 6 to 36Volts and reduce it to 3, 6, 9, 12 or 24 (as long as the output is a step down from the input).
